

ENVIROBACK – HS**HEAVY DUTY CRUSHER BACKING MATERIAL**

Applications	LARGE CONE CRUSHERS AND GYRATORY CRUSHERS
Description	<p>100% solids modified epoxy compound for backing wear plates in cone and gyratory crushers offering extreme heavy duty crushing, maximum protection, positive support of wear lines and high volumetric stability.</p> <p>ENVIROBACK HS is supplied in safe and convenient kit form for easy mixing and application.</p>
Preparation	Seal all crevices with putty or other suitable material to prevent backing material from leaking out.
Mixing	The resin and hardener must be thoroughly mixed before application by using a slow speed drill. Mixing continues until uniform colour is obtained (3-5 minutes). With ambient temperature at 25°C a full kit must be poured into place within 15–20 minutes.
Kit Size	10kg and 20kg
