

ENVIROBACK – STD**CRUSHER BACKING MATERIAL**

Applications	Large, medium, and small cone crushers Gyratory crushers, Grinding Mills
Description	100% solids modified epoxy resin backing material, especially formulated for the use in all types of cone crushers, grinding mills, primary, gyratory crushers and any other heavy machinery that requires backing material.
Flammability	Non-flammable material and requires no special mixing or melting equipment.
Preparation	Seal all crevices with putty or other suitable material to prevent backing material from leaking out.
Mixing	The resin and hardener must be thoroughly mixed before application by using a slow speed drill. Mixing continues until uniform colour is obtained. With ambient temperature at 25°C a full kit must be poured into place directly after mixing.
Kit Size	10kg and 20kg 1 x Kit = Resin and Hardener
