

Applications	<ul style="list-style-type: none">➤ Machine basis➤ Structural columns➤ Punch presses➤ Bridge seals➤ Rails, etc.
Description	100% solids modified epoxy grout formulated for fast and easy pouring up to 150mm . Due to the fluid consistency of the product, it flows well under rails, structural columns etc. - withstands high torque loading and vibration. Bonds to steel and concrete - can withstand temperatures up to 75°C .
Preparation	For best results provide a pouring area of 40mm or more between the foundation and column or rail.
Mixing	Mix with slow speed drill until uniform colour is obtained. With the ambient temperature at 25°C a full kit must be poured into place as soon as possible after mixing.
Kit Size	10Kg and 20Kg
