

ENVIROWEAR 360**PIPE LINING EPOXY CERAMIC**

Applications	A flowable epoxy ceramic specially designed to be applied in slurry lines etc. from a thickness of 6mm upwards, depending upon the application. Sizes: from 500mm to 9m lengths and/or 150 diameters to 1 diameter.
Description	100% solids modified epoxy resin system primarily formulated for pipe lining applications.
Surface Preparation	A properly prepared surface is important to the result and lasting durability of ENVIROWEAR 360. Steel surfaces should be dry grit blasted to SA 2.5 with blast profile between 50-70 microns to leave the surface free of oil and grease contamination. In cold conditions it is recommended to warm the substrate to 20-35°C.
Kit Size	16 kg Kits
